The demand for cooling continues to increase in line with environmental changes and a greater desire for human comfort. In north Africa and middle eastern countries, and particularly in ...

Results showed good functioning and applicability of these studied systems for various outdoor conditions of the major Tunisian cities. The energy necessary to sustain human thermal ...

As Tunisia faces rising temperatures and energy costs, solar air conditioners emerge as a game-changing solution. This article explores how solar AC systems work, their economic benefits,

Several independent programmes and regulations are already in place to increase the use of renewable energy and energy efficiency in the sector.

As Tunisia faces rising temperatures and energy costs, solar air conditioners emerge as a game-changing solution. This article explores how solar AC systems work, their economic benefits, and ...

In this paper, we present a solar cooling installation located at the Center of Researches and Energy Technologies (CRTE), in Bordj-Bou-Orja, Tunisia.

In Tunisia, buildings often grapple with excessive cooling and high energy consumption due to traditional summer cooling systems. Eco-friendly alternatives like solar cooling and dehumidification systems ...

Discover how Tunisia is leveraging solar-powered cooling systems to combat rising temperatures while reducing energy costs. This article explores innovative applications, government incentives, and real ...

Solar air conditioning units present a promising solution for air conditioning, especially desiccant units, in terms of environmental protection and energy saving.
