The project also aims to strengthen the electricity grid for the integration of renewable energies expected from solar and wind power plants that are being developed.

At its core, Tunisia's renewable energy infrastructure combines hardware components like solar panels, wind turbines, and energy storage systems with sophisticated software platforms for...

Tunisia is developing a \$4 billion project pipeline that includes 1700 MW of wind and solar energy as well as green hydrogen infrastructure, in addition to other infrastructure projects.

Under Prime Minister Sarra Zaafrani Zenzri, Tunisia approved renewable energy projects covering solar PV, wind capacity, storage plans, and future concession tenders.

The government of Tunisia has sealed a deal with the World Bank that will provide the country with funds to undertake reforms that will facilitate the ...

Tunisia has significant solar resources, but moderate to good wind potential. The costs of renewable energy generation are generally lower with stronger solar radiation and stronger wind speeds.

To ensure a resilient electricity network, Tunisia is investing in modern, secure infrastructure. The ELMED interconnection project, which will link Tunisia to Italy by 2028, will play a key role in ...

In 2022, only 3% of Tunisia's electricity is generated from renewables, including hydroelectric, solar, and wind energy. While STEG continues to resist private investment in the ...

The TEREK program is expected to support Tunisia in achieving its goals to mobilize US\$2.8 billion in private investment to add 2.8 gigawatts of new solar and wind capacity by 2028, ...
