-----

According to the new edition of the quarterly report, 5.3GW/14.5GWh of storage was installed in Q3 2025 in the US, pushing 2025 year-to-date installations past 2024 capacity.

Standalone energy storage made up nearly 30 GWh of the new capacity added in 2025, while systems paired with solar accounted for 20 GWh. Residential storage grew substantially, ...

Wood Mackenzie projects Q4 2025 will set a record for the residential sector as customers accelerate installations ahead of the Section ...

The residential energy storage sector added 3.1 GWh in 2025, marking a 51% year over year increase. Expansion of virtual power plant programs in states like Massachusetts, Texas, ...

U.S. energy storage surges in 2025, creating potential new grid, construction, and manufacturing opportunities as demand for reliable power soars.

The U.S. energy storage industry installed 57.6 GWh of new capacity in 2025, the largest single year of new battery capacity additions on record. Energy storage installations grew 30% from ...

The U.S. energy storage market added more than 2 GW across all segments in Q1 2025, marking the highest Q1 on record. The utility-scale ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...

Two-thirds of all utility-scale storage installed in 2025 was built in states won by President Donald Trump in the 2024 election. Texas is now on a trajectory to overtake California in 2026 as the ...
