---

"By enhancing the energy infrastructure of military installations, we are helping to meet tomorrow's defense needs." The Fort Polk solar project is ...

The U.S. Army has successfully demonstrated a novel deployable microgrid powered by perovskite-based solar panels--marking a significant step toward lightweight, high-efficiency ...

Military electric power supply, both strategic and tactical, must adapt to this reality and plan for increased future use of ...

The garrison's solar array supports the U.S. Department of Defense's operational readiness and resilience goals by providing clean energy and stable electricity ...

Developed with the support of industry collaborator Sesame Solar, the energy node combines the capabilities of photovoltaic (PV) panels with a hydrogen fuel cell to provide off-grid and ...

US-made perovskite tandem cells from Swift Solar were used in a US Department of Defense hybrid microgrid as part of a recent cybersecurity ...

Built for extreme conditions, our military-grade solar generators deliver rugged, reliable, and off-grid power. Waterproof, durable, and EMP-resistant, these high-performance solar solutions keep your ...

Sesame Solar designs and manufactures rapidly deployable, Mobile Nanogrids for the U.S. Military and our allies--powered by solar + hydrogen + battery storage--no fuel supply chain required.

The Department of Defense (DoD) announced at Fort Liberty today, a first-of-its-kind partnership with Duke Energy to power five military installations ...
