VEConfigure is a free software program which allows you to program and update settings in VE.Bus products such as Phoenix Inverters, Chargers, Multis and Quattros.

Notice your battery is now defaulted to 10Ah. This is a chicken-and-egg scenario where you now set one value and the other changes and vice-versa. Should I be concerned as this is the ...

Until now our VE.Bus Quick Configure software was required to set up a complex VE.Bus System. This is not the case anymore as VictronConnect can now be used to configure systems of up to three units.

There are two cable types with differing pin configurations included in each eTower package, one to suit Victron, and the other to suit what Freedom Won describes ...

Freedom Won LiTE batteries can configure themselves automatically for master and slave configurations with up to 20 slaves. No programming is required, simply connect the CAN Bus cables ...

In order to setup the software portion of the EMS system one will have to have access to the internet, setup a valid account on the EMS Portal and have the relevant permissions on that account to add ...

Table 2.1 provides an overview of the Freedom Won 12V General Purpose range. An image showing the General-Purpose range is provided in Figure 2.1. ...

These Freedom Won LiTE batteries are fully compatible with the Victron MultiPlus, MultiPlus-II, MultiPlus-II GX, and Quattro inverter/chargers, solar charge controllers (VE.Direct and ...

Freedom Won E-Connect User Manual distributor or Reseller Installer. A directory of authorised Distributors and Reseller Installers can be found on our website. For advanced support, contact ...

If you are having difficulty with connecting to a VE.Bus device with a laptop and an MK3-USB adaptor, try

Ve configure freedomwon

the following troubleshooting steps to help isolate the issue.
