---

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...

The U.S. energy storage industry installed 57.6 GWh of new capacity in 2025, the largest single year of new battery capacity additions on record. Energy storage installations grew 30% from ...

Figure 1: Installed Capacity of Newly Commissioned New-Type Energy Storage Projects in China, January 2026 Source: CNESA DataLink Note: Year-on-year (YoY) comparisons are based on ...

New US battery capacity in 2026: 24.3 GW of new battery storage to come online From Texas-sized utility projects to skyrocketing residential battery attach rates, 2026 marks the year solar ...

The United States (US) installed a record 57.6 gigawatt-hours (GWh) of new energy storage capacity in 2025, marking the largest single year of battery deployment on record, according ...

The U.S. has 431 operational battery energy storage projects, 8 using lead-acid, lithium-ion, nickel-based, sodium-based, and flow batteries. 10 These projects ...

Global installed energy storage capacity by scenario, 2023 and 2030 - Chart and data by the International Energy Agency.

The installed capacity of energy storage projects refers to the total amount of electrical energy that these systems can store and subsequently ...

Key Findings In 2025, battery energy stationary storage (BESS) installations surpassed 57 GWh/28 GW, a y-o-y increase of 29% (GWh). The utility-scale market underpinned growth with just ...
