Overview Government action Solar manufacturing industry See also External links The Japanese government is seeking to expand solar power by enacting subsidies and a feed-in tariff (FIT). In December 2008, the Ministry of Economy, Trade and Industry announced a goal of 70% of new homes having solar power installed, and would be spending \$145 million in the first quarter of 2009 to encourage home solar power. The government enacted a feed-in tariff in November 2009 that requires utilities to purchase excess solar power sent to the grid by homes and businesses and pay twice the st...

As a leading global CRDMO, with over 12,000 skilled employees in the United States, Ireland, Germany, China and Singapore, WuXi Biologics provides an ...

Solar energy represents the largest energy-producing renewable energy source in the country. In fact, solar power stations had the highest number of renewable electric power plants on ...
