Overview Comparison with other power sources History Wind power density Efficiency Types Design and construction Technology Wind turbines is one of the lowest-cost sources of renewable energy along with solar panels. As technology needed for wind turbines continued to improve, the prices decreased as well. In addition, there is currently no competitive market for wind energy (though there may be in the future), because wind is a freely available natural resource, most of which is untapped. The main cost of small wind turbines is the pur...
