Types of Welders
Step 1: Determine The Type of Metal You Will Be Welding
Step 2: Establish A Current Range That Covers All Possible Metal Thicknesses
Step 3: Decide Where You Will Be Welding
Step 4: Understanding Key Features to Compare
Step 5: Determine If You Need to Use Compressed Gases
Now Find Your Welder
Wrapping It Up
Choosing the right welder comes down to finding what machine fits your needs. The five key points just covered will aid you in that process and include: 1. Determine the types of metal you will be welding. 2. Identify the thickness range you intend to work with (and the output amps needed). 3. Think about where you will be working (e.g., indoors vs...
