The purpose of this study is to investigate the potential use of solar energy within an oil refinery to reduce its fossil fuel consumption and greenhouse gas emissions.

MOBIPOWER hybrid clean power containers combine battery energy storage systems with off-grid solar containers for remote industrial sites in Canada & USA.

Available for purchase or rental, our mobile off-grid power systems are fully self-contained, harnessing both wind and solar through small scale wind turbines ...

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

The study explores the feasibility of incorporating solar, wind, and biomass energy sources alongside the existing Natural Gas Combined Cycle (NGCC) power plant and grid connection to ...

Discover our range of innovative solar panels on shipping container products engineered to meet your renewable energy needs with maximum efficiency and ...

Each unit is 100% solar-powered with battery backup, requiring no fuel, generator, or grid connection--ensuring uninterrupted, dependable operation in any ...

Can wind-solar energy be used on offshore oil and gas platforms? This research assesses the environmental feasibility of using wind-solar energy for offshore oil and gas platforms in the Caspian ...

Falcon Structures modified 11 20-foot containers similarly for EWX, complete with a custom top canopy with 15 solar ...
